

## Special occasion

Every spring our school does a spring trip together with the families. Parents and pupils gather money all year by selling e.g. socks, cookies and candles and organizing Christmas market at school. In 2014 we made a three day journey to eastern Finland, this year we are travelling to south east part of Finland and spend one night there. Normally school classes do a trip maybe once or twice during primary school but because we are such a small school and village it's easier for us to arrange something special. ;)

### Gathering money and learning business skills

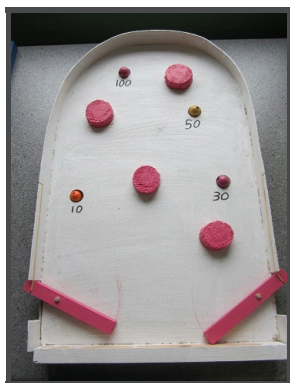

## Sport & play: "Hyllypallo", shelf and ball

One of the most popular games among the students is Hyllypallo, The shelf and the ball. The main idea is to burn others by throwing the ball. If one get hit, he has to go to stand on "a shelf" that is to stand by the playing field.

Winner is the last one standing in the middle with the ball. To increase the speed of the game there is a rule that every now and then teacher can order to "Empty the shelf!" after which all the players return back to the field and the game goes on.

## Math and handicraft

**Pupils made math games at school. The idea is the same than in pinball: to try to get the marbles in the holes and then to count how many points one got. Nevertheless the idea is quite simple but games have become very addictive!**
